TTRTECHNOLOGY

Block email threats before they reach you with TTR Technology's Email Security-as-a-Service.

(866)-217-7225 INFO@TTRTECHNOLOGY.COM TTRTECHNOLOGY.COM

DID YOU KNOW ?

- 85% organizations have encountered phishing emails at least once.
- 81% of malicious files are distributed by email.
- 1 in 239 email attachments are malicious!
- 1 in 415 Links in emails are malicious!

TTR Technology Email Security-as-a-Service (ESaaS) protects businesses from a wide range of email threats, including spam, phishing, malware, and ransomware. With TTR Technology's ESaaS, companies can hand off their email security to our expert team, which delivers 24/7 monitoring and management of email protection systems. This allows organizations to concentrate on their main business goals while ensuring their email communications remain secure from cyber risks.

TTR Technology's ESaaS is a smart solution for businesses of any size—especially those without the resources or in-house expertise to manage complex email security setups. By partnering with us, organizations gain access to advanced, enterprise-grade email protection and expert support, all at a fraction of the cost of building and running their own security infrastructure.

MANAGING EMAIL SECURITY IN-HOUSE: A MULTI-FACETED CHALLENGE

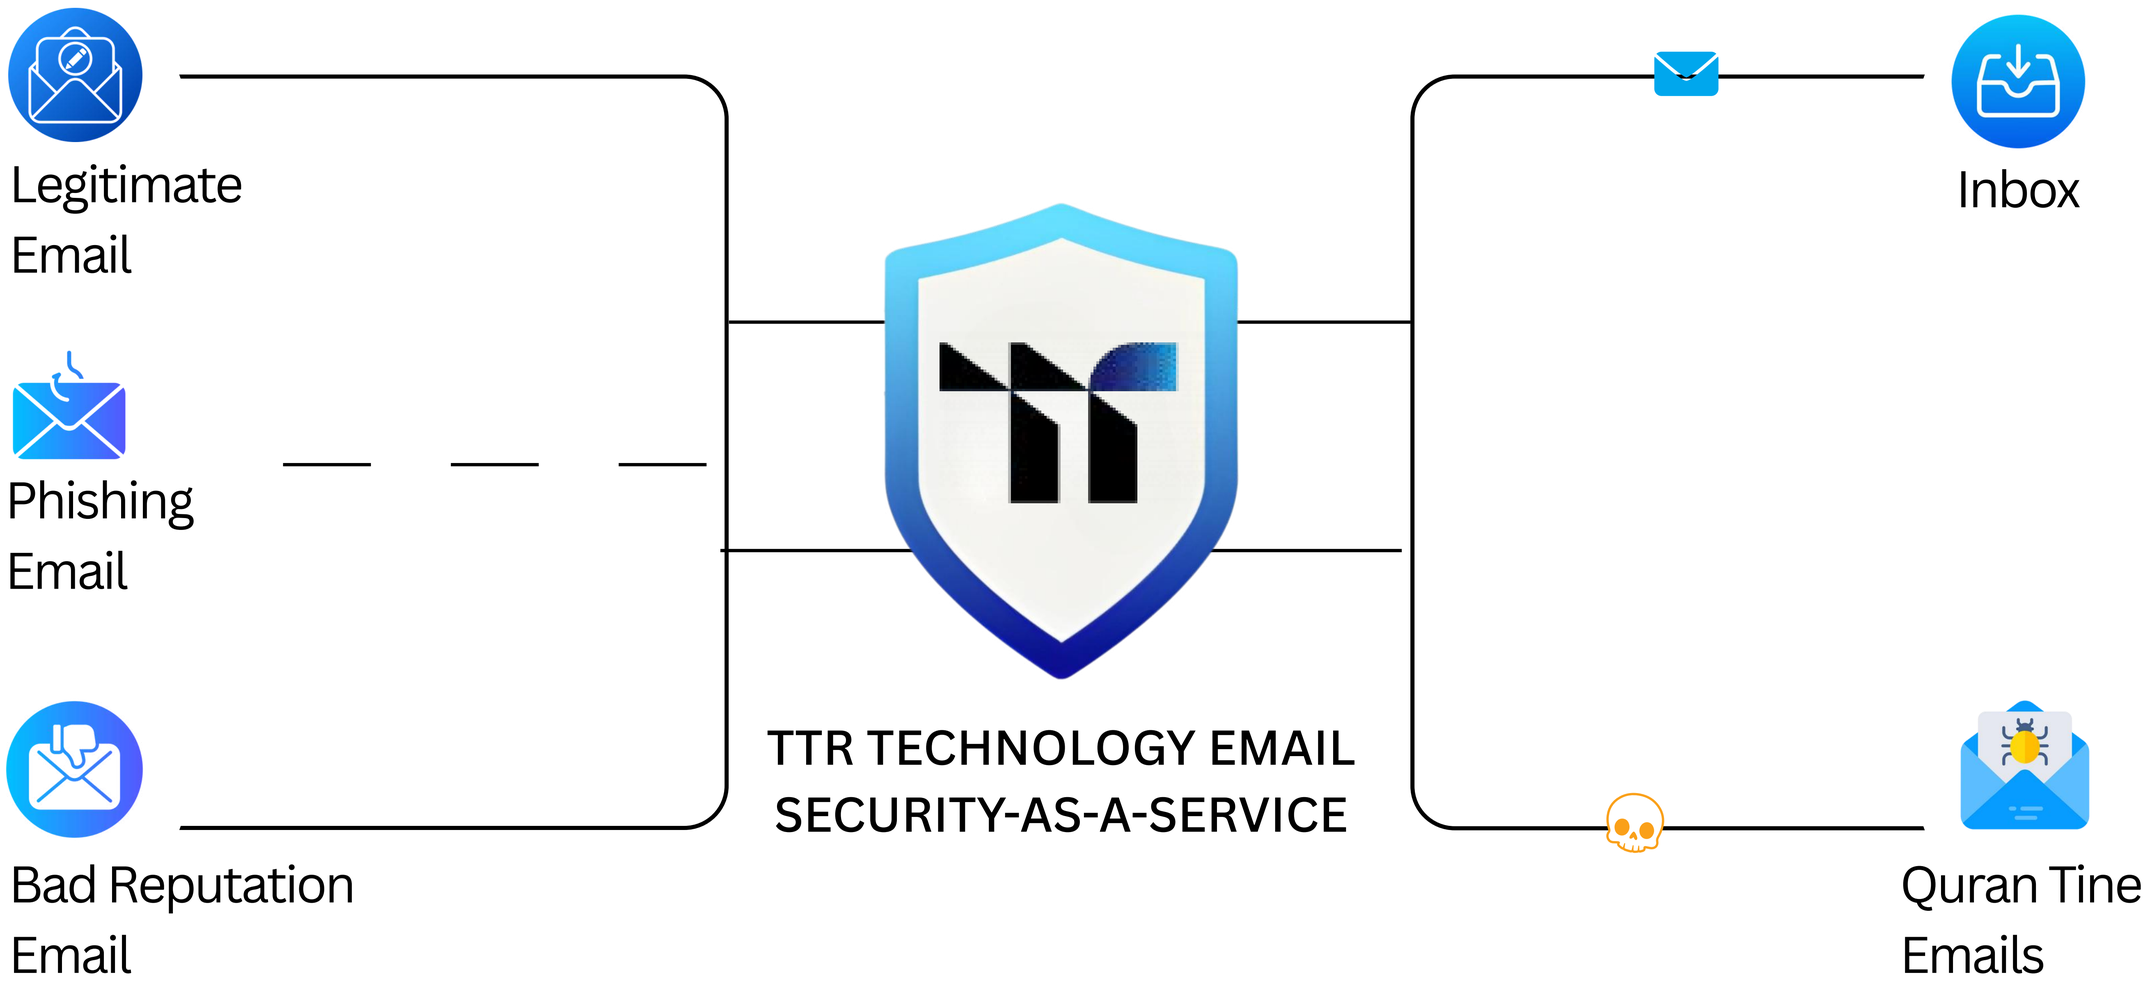

Expertise: Setting up strong email security controls demands advanced skills. For many small and mid-sized businesses, the lack of resources and specialized knowledge makes it hard to detect and stop today's complex email threats.

Time: Handling email security in-house is a major time drain. It pulls attention away from other business priorities, especially since monitoring and responding to email threats requires constant, 24/7 effort and analysis.

Cost: Building and maintaining a reliable email security system comes with a hefty price tag. Beyond the tools and technologies, companies also face high costs for hiring, training, and retaining skilled security staff.

Evolving Threat Landscape: Email threats are always changing. Their growing complexity makes it harder for internal teams to stay updated on the newest tactics and the best ways to defend against them.

HOW DOES TTR TECHNOLOGY EMAIL SECURITY-AS-A-SERVICE WORK?

TTR Technology Email Security-as-a-Service – Key Benefits

- Advanced, AI-Powered Protection: Multi-layered email security powered by AI to block spam, phishing, and other threats before they reach users' inboxes.

- Complete Coverage: Protects against all major email threat vectors—including spoofing, phishing, malware, anomalies, shadow IT, and user behavior analytics (UBA).

- Proactive Recommendations: Continuous analysis of corporate email traffic to suggest ways to strengthen your email security posture.

- Compliance & Custom Reports: Ensures compliance with local data privacy laws and delivers customized reports to support audits.

- Regular Governance Calls: Weekly, monthly, or quarterly SOC (Security Operations Center) calls to review security posture and incidents.

- Rapid Response Support: 30-minute GOLD SLA and access to a dedicated 24/7 toll-free SOC support number.
