TTRTECHNOLOGY

MEDR-AS-A-SERVICE

Uncover threats and protect your IT infrastructure with TTR Technology MEDR.

(866)-217-7225 INFO@TTRTECHNOLOGY.COM TTRTECHNOLOGY.COM

TTR Technology's Managed Endpoint Detection and Response-as-a-Service (MEDR-as-a-Service) offers a comprehensive security solution that utilizes industry-leading Enterprise-Grade ActiveEDR technology. This technology combines AI-powered prevention, detection, response, and threat-hunting capabilities to protect user endpoints, containers, cloud workloads, and IoT devices. With TTR Technology's MEDR, you can access turnkey security cost-effectively, as it is more affordable than hiring a single security analyst.

WHY TTR TECHNOLOGY?

- A SOC 2 Type II and ISO 27001 Certified SOC
- Industry-Beating Priced, Premium Quality Service
- 1000+ Customers Across 20+ Countries
- Global SOC Presence with Strategic Locations Worldwide
- Flexible Engagement Models: Fully-Managed Turnkey / Co-Managed Options
- Lightning-Fast 15-Minute GOLD SLA Response Time

Challenges of Managing EDR In-House

Lack of Expertise EDR solutions demand specialized skills to set up, configure, and manage. Without a team of trained professionals, organizations struggle to unlock the full potential of EDR tools.

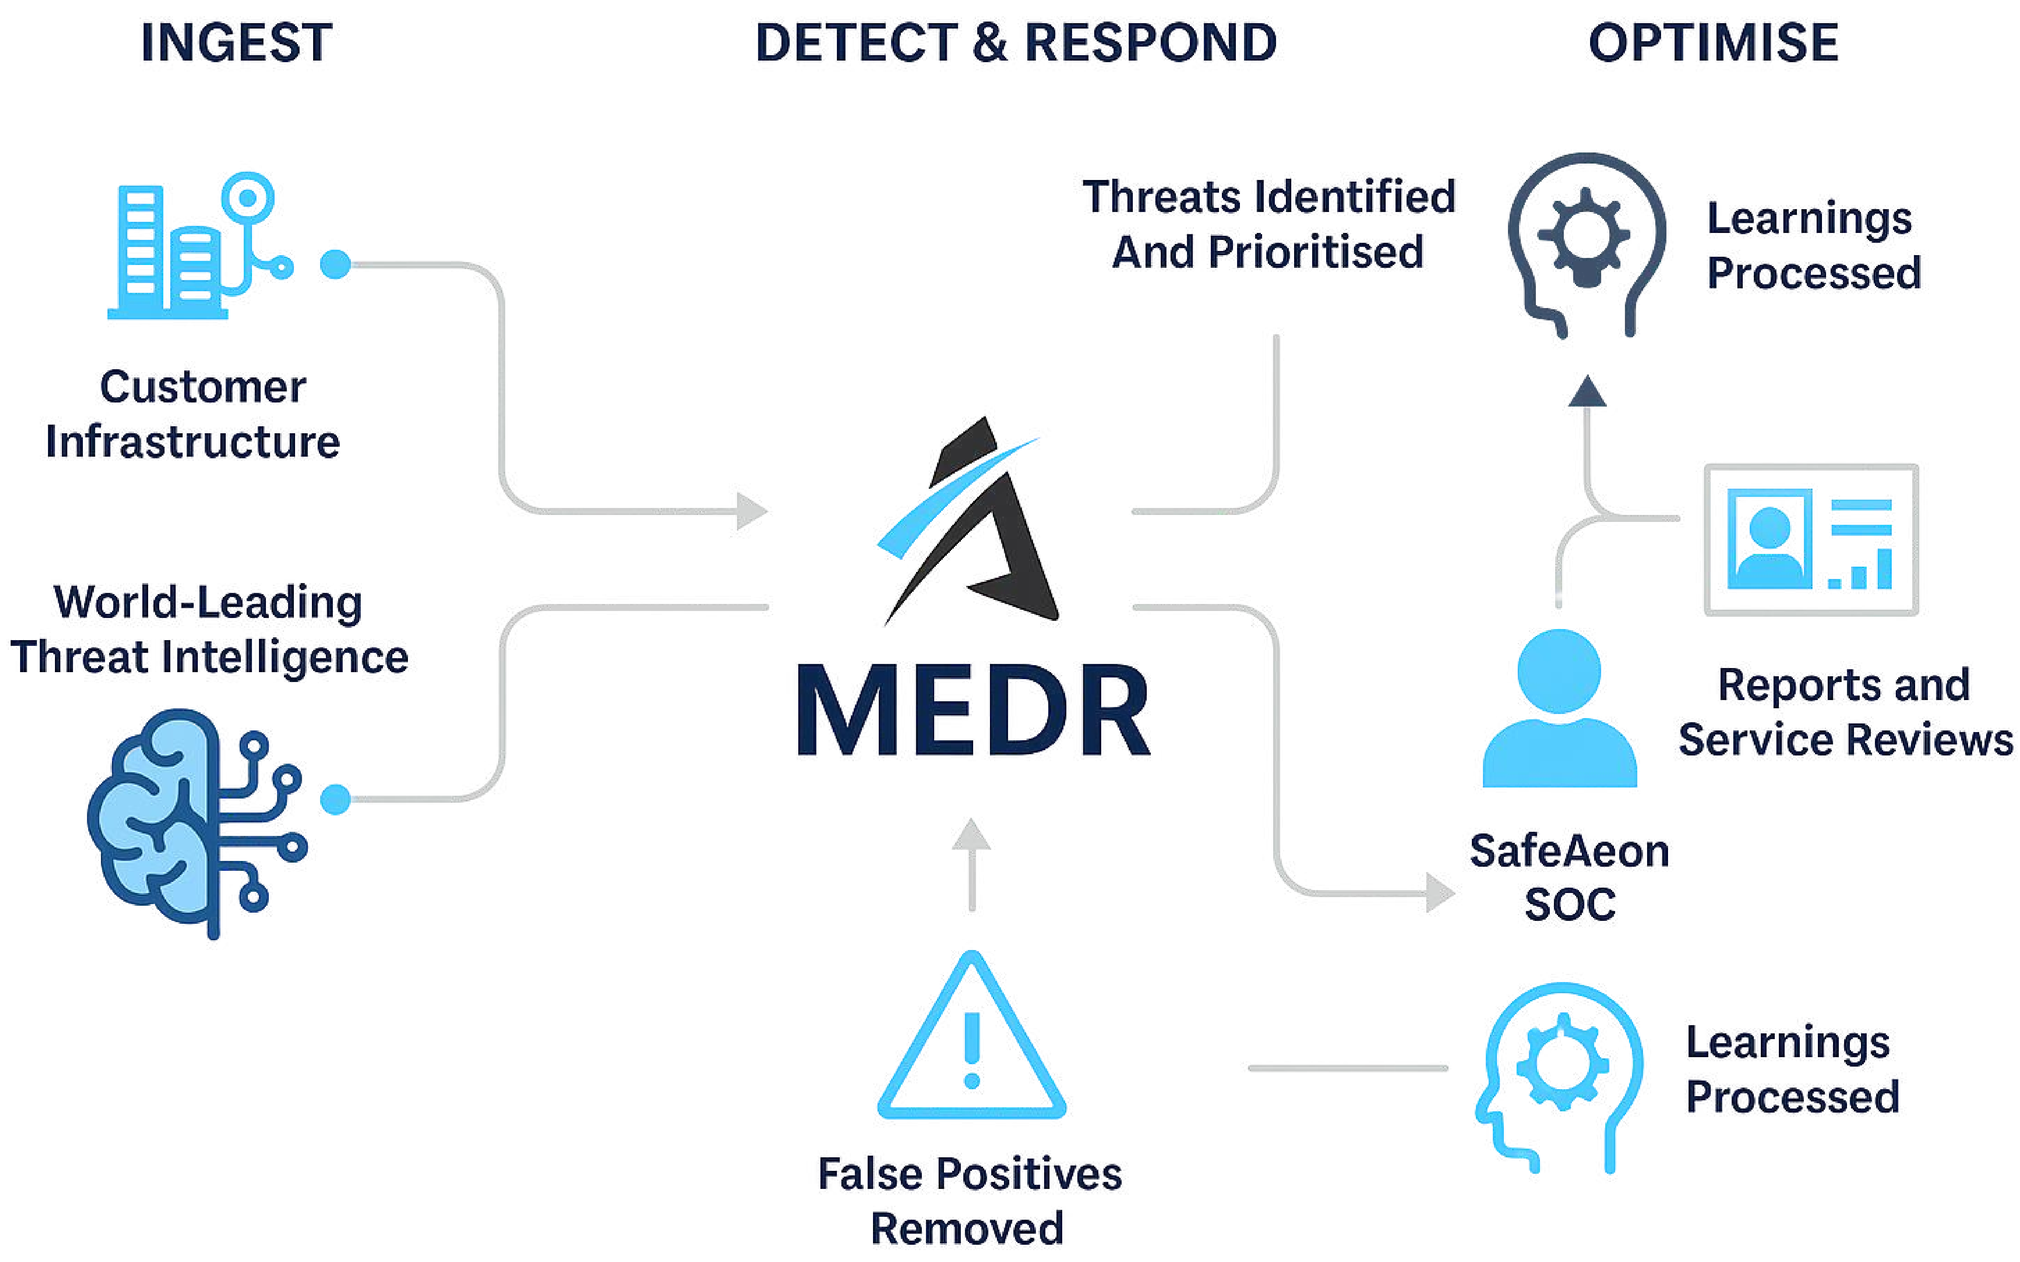

Limited Resources EDR management is resource-intensive, requiring constant attention to updates, system configurations, and policy enforcement.

Rapidly Evolving Threat Landscape Keeping pace with new and sophisticated threats requires continuous data analysis across endpoints, network traffic, and security platforms—often overwhelming for in-house teams.

Scalability Issues Scaling EDR to accommodate a growing organization or a large fleet of endpoints can be complex and costly.

Integration & Automation Gaps Effective EDR systems should integrate with SIEM, IDS, firewalls, and other tools. Lack of automation and integration hampers efficiency and visibility.

High Costs In-house EDR implementations involve substantial investment in hardware, software, and specialized personnel—making them financially burdensome for many organizations.

TTR Technology 24x7 MEDR Service - Benefits

- Enterprise-Grade ActiveEDR
- Next-Gen Antivirus & Behavioral AI
- Ransomware Protection
- Script Misuse & Hacking-Tool Prevention
- Macros & Memory Exploits Detection
- Trojans & Rootkit Defense
- Triage via Various IOC Repositories
- Deep Visibility Storyline Pivot
- Digital Forensics Investigations (DFI)
- Network Control Policies
- Device Firewall Policies
- USB/Bluetooth Device Control
- Advanced Persistent Threats (APTs) Detection
- Proactive Threat Hunting
- Hunting via MITRE ATT&CK Framework

(866)-217-7225 INFO@TTRTECHNOLOGY.COM TTRTECHNOLOGY.COM

- Lateral Movement Attacks Detection
- Zero-Day Attack Protection
- Customizable Network Isolation

TTR TECHNOLOGY - SUPPORTED MEDR VENDORS

SentinelOne, Microsoft Defender, Bitdefender, SOPHOS, CROWDSTRIKE, TREND MICRO, CHECK POINT, elastic + ENDGAME., kaspersky, eset, vmware Carbon Black

ABOUT

TTR TECHNOLOGY

TTR Technology's MDR-as-a-Service delivers continuous threat detection, expert analysis, and rapid response—powered by a cloud-driven SOC. Protect your business with real-time security intelligence and hands-on defense. Get in touch today to secure what matters most.

MISSION

TTR Technology delivers secure, reliable managed IT and cybersecurity solutions, helping businesses protect their data, streamline operations, and grow confidently.
